

How to find vehicles using search on the Map:

If the map is in Search View mode, search or filter must be applied for icons to show on the Map.

- 1
- Open the Map. Start typing asset ID in the search field; the portal refreshes a list of vehicles matching input.

3

Select the correct asset ID when shown to display the vehicle icon on the map.

A broader search can be performed using a vehicle attribute (e.g., model). Enter the search term (e.g., Soul). Map refreshes view with vehicles matching criteria.

How to find vehicles using filters on the Map:

1	

cognosos

Open the Map and select Filters. Create a new filter or select a pre-defined filter. A folder icon represents application-wide filters (for all users). Otherwise, filter is only for the logged in user.

When making a new filter, check the attributes
for filtering the list. Use one or a combination to
create desired list.

3

2

Once applied, map refreshes with vehicles meeting filter criteria.
