# How to configure a ProPAR zone:
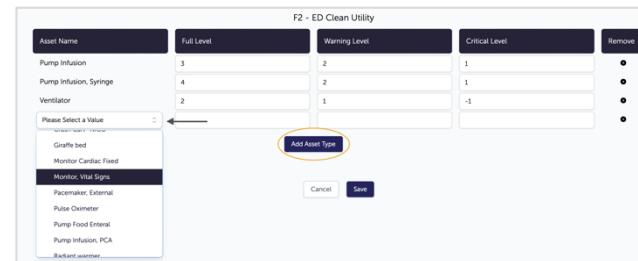

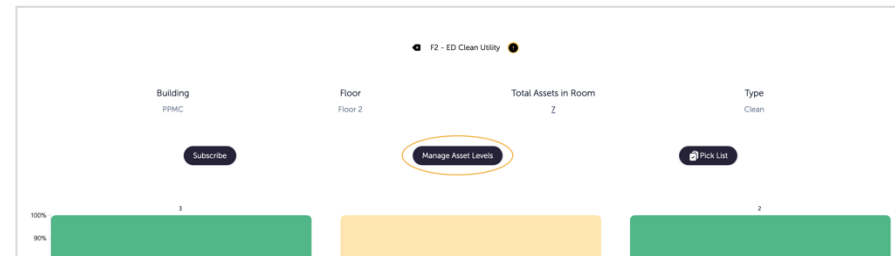

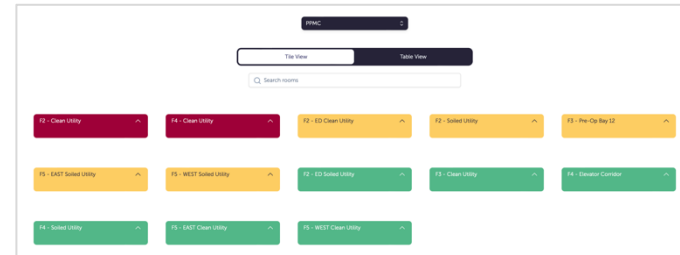

1 Open the Zones page under My Site. Search for zone; click Edit icon from Actions column. You must have Administrator user rights to edit zones.

2 Choose Clean or Soiled in the Edit Zone window and save.

3 You may also perform this action from the Map. Locate and select zone and click pencil icon on right.

Define ProPAR Zone

How to configure ProPAR assets:

1 Select ProPAR on the main menu. Locate and open the appropriate zone from either the Table or Grid ProPAR view.

2 On the ProPAR zone screen, choose Manage Asset Levels (Administrator level user roles only).

3 Add asset types (select asset type with drop-down) and levels; or edit existing assets/levels and save.
